

13.1 - The Singularity and The Future

Artificial Intelligence Policy

Prof. Jack Reilly

S2026

Think:

- *What does the future hold? Is there an AI Singularity on the horizon?*
- *Are current AI paradigms, products, and tools sufficient to bring about substantial technological and societal change? Do we need a new paradigm for AI to continue to advance? Is there another AI winter on the horizon without substantial new scientific and technological invention?*
- *Is AI a greater or lesser existential risk than other threats (nuclear, climate, disease, etc) facing humanity? Or is AI not really about threat at all, and more about promise? Can we build a better future for us all with technology?*

Tip

- “ Read”, “ Listen”, and/or “ Watch” items are required content for the day, and should be read/heard/watched before class on that day.
- “ Browse” items should be briefly looked at but do not need to be read deeply unless you want to
- “ Additional Resources” do not need to be looked at; they are there to serve, if useful, as further references for your debates, final projects, and general edification later.
