

# 9.1 - Foreign Policy

## Artificial Intelligence Policy

Prof. Jack Reilly

S2026

### Reorienting and Taking Stock

- We are halfway through the class!
- Today, we'll talk about geopolitics and foreign policy, but also recenter ourselves after the first half of the course (and after the week off).
- Where have we been, and what have we learned?
- As we make our transition from talking about the philosophy, technology, and development of AI to talking about implications and impacts, what has been surprising?
- Where do we *most* need policy, and what areas of AI most call out for intervention or support?

### Think

- *What is AI's role in national defense and security?*
- *What responsibility do AI firms have to their "home" countries? Are they like defense contractors? Should the government have a special role in controlling AI technology and approving AI military technology sales?*

### Read

- Horowitz et al, "[AI, the International Balance of Power, and National Security Strategy](#)". *The Oxford Handbook of AI Governance*

**Browse:**

- [“What Google’s Return to Defense AI Means”](#)
- [“Anthropic Refuses Pentagon’s Proposal to Loosen AI Guardrails”](#) *Wall Street Journal*
- [“Elon Musk Moves Against the Russians in Ukraine”](#)

**Tip**

- “ Read”, “ Listen”, and/or “ Watch” items are required content for the day, and should be read/heard/watched before class on that day.
- “ Browse” items should be briefly looked at but do not need to be read deeply unless you want to
- “ Additional Resources” do not need to be looked at; they are there to serve, if useful, as further references for your debates, final projects, and general edification later.
