

9.1 - Foreign Policy

Artificial Intelligence Policy

Prof. Jack Reilly

S2026

Reorienting and Taking Stock

- We are halfway through the class!
- Today, we'll talk about geopolitics and foreign policy, but also recenter ourselves after the first half of the course (and after the week off).
- Where have we been, and what have we learned?
- As we make our transition from talking about the philosophy, technology, and development of AI to talking about implications and impacts, what has been surprising?
- Where do we *most* need policy, and what areas of AI most call out for intervention or support?

Think

- *What is AI's role in national defense and security?*
- *What responsibility do AI firms have to their "home" countries? Are they like defense contractors? Should the government have a special role in controlling AI technology and approving AI military technology sales?*

Read

- Horowitz et al, "[AI, the International Balance of Power, and National Security Strategy](#)".
The Oxford Handbook of AI Governance
 - [Syracuse library link](#)
- Make sure to be familiar with the Anthropic/Department of Defense story for class discussion (see possible sources below).

Listen:

- *Not required, but recommended:* Dean Ball, 2026. “[Why the Pentagon Wants to Destroy Anthropic](#)”, *The Ezra Klein Show*, New York Times. Also see [Youtube link](#)

Browse:

- The recent Anthropic/Pentagon dustup is relevant and interesting from a variety of dimensions.

Tip

- “ Read”, “ Listen”, and/or “ Watch” items are required content for the day, and should be read/heard/watched before class on that day.
- “ Browse” items should be briefly looked at but do not need to be read deeply unless you want to
- “ Additional Resources” do not need to be looked at; they are there to serve, if useful, as further references for your debates, final projects, and general edification later.
